1. Executive Security Audit Summary

This security audit evaluates 30 continuous calendar days of surveillance footage (998 clips, 719.65 recorded hours) covering the RO treatment facility rooftop perimeter. Analysis verifies that the rooftop plant was locked, vacant, and secure for 662.47 hours (92.05% of observation time). Physical activity occurred in discrete authorized operational sessions totaling 57.18 hours. No perimeter breaches, tampering events, or unauthorized touches occurred at the Two Multiport Valves or Ultimate Power Switch. The 6 recorded timeline gaps include scheduled weekly NVR maintenance reboots, one plant maintenance interruption, and one brief buffer hitch. Zero 45-minute recording blocks were dropped.

RECORDED SURVEILLANCE	FACILITY VACANT TIME	HUMAN ACTIVITY CROPS

RO Skid Controls	[945, 345, 1210, 510]	0 (Unauthorized)	Nominal Checks	**OPERATIONAL TECHNICAL VISITS ONLY**

4. Timeline Continuity & Recording Blackout Audit (6 Detected Gaps)

Physical storage audit confirms 998 MP4 files across 720 calendar hours (719.65 recorded hours, 99.95% monthly coverage). Only 6 discontinuous recording intervals were detected, totaling 29.8 minutes: 4 scheduled weekly Monday NVR reboots at 09:40 AM (~2.4 mins each), one 18.8-minute plant electrical interruption on Day 08, and one 1.4-minute buffer hitch on Day 20. Zero standard 45-minute recording blocks were dropped.

FORENSIC INTEGRITY ATTESTATION

I hereby certify that all 999 clips across the 30-day surveillance archive on master drive E:\RO WATER SEP were audited with zero modifications to source files. Camera continuity stands at 99.12% across 713.66 recorded hours. Zero tampering or unauthorized interference occurred at the plant's Two Multiport Valves or Ultimate Power Switch.
