CCTV FOOTAGE REVIEW REPORT

Simple Summary of Recording Issues

Client	**DBGT**	**Report Date**	2026-10-29
Location / Site	RO Water Treatment Plant Rooftop Deck	**Report Reference**	DBGT-THOOR-2026-RO-001
Reviewed By	**ThoorigAI Infotech**	**Primary Sensor**	Overhead 3K Camera IPC56

Purpose: This report explains any CCTV footage that appears to be replaced, missing, or relevant to a specific incident. Details are compiled after comprehensive forensic verification of the physical 30-day continuous archive (719.65 recorded hours from Camera IPC56, 99.95% coverage across 998 physical files).

1. Video Appears to Be Replaced

Use this section when a recording appears to show a different day, time, or unrelated video instead of the expected footage.

Camera Name	Expected Date / Time	Date / Time Shown in Video	What Looks Wrong?	Status
IPC56	2026-09-27 (Day 27)	2026-09-26 (Day 26)	All 33 clips in Day 27 are identical bit-for-bit file duplicates of Day 26 (matching 5,444 crops, 90.6m activity duration). Actual Sept 27 footage was substituted.	**Confirmed (Replaced / Duplicated)**

Plain-language finding: Temporal bitstream, file hash, and candidate crop analysis revealed that all 33 CCTV recordings archived under Day 27 (2026-09-27) are identical duplicate copies of Day 26 (2026-09-26). Both directories share identical candidate counts (5,444 crops) and 90.6 minutes of active movement. Legitimate footage for Sunday, September 27 was substituted with re-dated Day 26 recordings.

Status guide: Confirmed = supported by verification. Suspected = signs of a problem, but not fully proven. Unclear = more information is needed.

2. Missing CCTV Footage

List each time period for which the expected recording could not be found.

Camera	Date	Missing From	Missing Until	Duration	Root Cause / Operational Pattern
IPC56	Day 07 (Mon 09-07)	09:40:14	09:42:40	2.4 mins	Automated Weekly NVR Reboot (09:40 AM)
IPC56	Day 08 (Tue 09-08)	14:45:37	15:04:23	18.8 mins	Inter-Clip Buffer Hitch / Plant Maintenance
IPC56	Day 14 (Mon 09-14)	09:40:14	09:42:42	2.4 mins	Automated Weekly NVR Reboot (09:40 AM)
IPC56	Day 20 (Sun 09-20)	23:42:00	23:43:22	1.4 mins	Inter-Clip Buffer Hitch
IPC56	Day 21 (Mon 09-21)	09:40:14	09:42:39	2.4 mins	Automated Weekly NVR Reboot (09:40 AM)
IPC56	Day 28 (Mon 09-28)	09:40:16	09:42:41	2.4 mins	Automated Weekly NVR Reboot (09:40 AM)

Customer-friendly summary: Surveillance coverage achieved **719.65 recorded hours** across the 30-day month (**99.95% timeline coverage** across 998 physical MP4 files). Ground-truth physical drive verification confirmed **only 6 verified recording gaps occurred, totaling 29.8 minutes (0.50 hours)**: scheduled weekly 2.4-min NVR maintenance reboots every Monday at 09:40 AM (Days 07, 14, 21, 28), one plant maintenance interruption (18.8m on Day 08), and one buffer hitch (1.4m on Day 20). Physical disk verification confirmed that the previously suspected morning block on Day 21 (07:17–08:02) is 100% intact on master storage media. Zero dropped 45-minute recording blocks exist in the archive.

3. Incident Details / Person Seen (20 Confirmed Events)

Universal Alert Standard: *Alert triggered due to physical presence / activity detected in monitored equipment area.*
Note on Event Descriptions: Because specific component-level interaction or operational motive cannot be determined from video footage alone, all events are recorded with the standardized universal alert description above.

Attached Google Drive Folder (All 20 Confirmed Incident Video Clips):
https://drive.google.com/drive/folders/1uhX9iv6-uBRRgBP4xMopMYQNWnKL6oYo
All 20 lossless MP4 video clips (with ±60s contextual margins) are accessible in this single shared drive folder.

Incident Date	Camera Name	Footage Start Time	Footage End Time	What Happened? (Universal Alert Description)	Person Ref. / Name (if verified)
2026-09-01	IPC56	09:52:38	09:54:38	Alert triggered due to physical presence / activity detected in monitored equipment area	**REAL-01 (SUBJ-1652)**

Person Photo / Screenshot Record (All 11 Unique Individuals)

Attached photographic face crops and forensic profiles for all 11 unique individuals involved in the 20 confirmed incidents above. All individuals are classified as Unregistered Subjects pending formal DBGT employee enrollment.

Photo	Person Ref.	Camera & Time	Description / Visual Features	Incidents Linked	Identification Status
	**REAL-01** Anchor: SUBJ-10 / SUBJ-1652	IPC56 2026-09-01 09:53:38	Teal/green polo shirt, curly hair, mustache & goatee. Primary recurring operator.	8 Incidents (EVT-D01-005, EVT-D09-005, EVT-D09-011, EVT-D24-002, EVT-D24-004, EVT-D24-011, EVT-D24-013, EVT-D25-003)	**Unregistered Subject (Pending DBGT Enrollment)**
	**REAL-03** Anchor: SUBJ-16	IPC56 2026-09-15 10:33:08	Light coloured work shirt, dark trousers. Morning shift technician.	1 Incident (EVT-D15-002)	**Unregistered Subject (Pending DBGT Enrollment)**
	**REAL-04** Anchor: SUBJ-342	IPC56 2026-09-11 15:30:52	Light blue work shirt. Maintenance technician.	1 Incident (EVT-D11-006)	**Unregistered Subject (Pending DBGT Enrollment)**
	**REAL-05** Anchor: SUBJ-01	IPC56 2026-09-01 22:26:36	Grey work attire, dark hair. Routine maintenance operator.	2 Incidents (EVT-D01-010, EVT-D26-002)	**Unregistered Subject (Pending DBGT Enrollment)**
	**REAL-06** Anchor: SUBJ-03	IPC56 2026-09-09 01:50:18	Dark night vigilance attire, short hair.	1 Incident (EVT-D09-001)	**Unregistered Subject (Pending DBGT Enrollment)**
	**REAL-07** Anchor: SUBJ-04	IPC56 2026-09-07 07:38:27	Dark casual shirt, slim build. Morning servicing operator.	2 Incidents (EVT-D07-001, EVT-D26-003)	**Unregistered Subject (Pending DBGT Enrollment)**
	**REAL-22** Anchor: SUBJ-28	IPC56 2026-09-11 14:15:46	Casual work shirt. Afternoon technician.	1 Incident (EVT-D11-004)	**Unregistered Subject (Pending DBGT Enrollment)**
	**REAL-23** Anchor: SUBJ-29	IPC56 2026-09-11 09:49:20	Blue work attire, short dark hair. Morning technician.	1 Incident (EVT-D11-003)	**Unregistered Subject (Pending DBGT Enrollment)**
	**REAL-24** Anchor: SUBJ-31	IPC56 2026-09-11 14:40:33	Collared shirt, straight dark hair. Maintenance technician.	1 Incident (EVT-D11-005)	**Unregistered Subject (Pending DBGT Enrollment)**
	**REAL-29** Anchor: SUBJ-38	IPC56 2026-09-11 06:32:37	Dark shirt, medium build. Early morning operator.	1 Incident (EVT-D11-001)	**Unregistered Subject (Pending DBGT Enrollment)**
	**REAL-33** Anchor: SUBJ-42	IPC56 2026-09-25 11:42:10	Dark blue work attire. Midday operator.	1 Incident (EVT-D25-002)	**Unregistered Subject (Pending DBGT Enrollment)**

4. Overall Result

Comprehensive audit synthesis and actionable recommendations based on empirical verification of 719.65 recorded hours, 6 footage gaps (29.8m downtime), and 20 confirmed physical incidents.

Issue Type	Found?	Detailed Audit Summary & Next Action
Video replaced / suspicious video	**YES (Confirmed)**	**Sunday Video Substitution Confirmed:** All 33 clips archived under Day 27 (2026-09-27) are identical bit-for-bit file duplicates of Day 26 (2026-09-26), matching 5,444 candidate crops and 90.6 minutes of activity. Legitimate Sunday footage was substituted with re-dated Day 26 recordings. *Next Action:* Request original physical NVR backup tapes/drive for Sept 27 to determine whether original footage was overwritten or misfiled.
Missing footage	**YES (Verified)**	**99.83% Timeline Coverage Maintained:** Total 7 verified recording interruptions totaling 1.25 hours (74.7 minutes) across the 720-hour month. Characterized by scheduled weekly 2.4-min NVR maintenance reboots every Monday at 09:40 AM (Days 07, 14, 21, 28), two buffer hitches (18.8m on Day 08, 1.4m on Day 20), and one 44.9-min morning gap on Day 21 (07:17–08:02). All other standard 45-minute recording segments are fully present. *Next Action:* Reconfigure Monday 09:40 AM automated reboot schedule to non-operational hours (e.g., Sunday 02:00 AM) and verify network buffer storage.
Incident / person details (20 Confirmed Events)	**YES (Verified)**	**20 Monitored Equipment Area Alert Events Confirmed:** Across 719.65 monitored hours (99.95% coverage), exactly 20 physical activity alert events were manually verified and confirmed in the monitored plant equipment deck. Due to camera angle and distance, specific component-level interaction is not definitively determined from footage alone; all 20 events represent verified physical presence and activity in the equipment deck during active surveillance periods. • **11 Unique Unregistered Personnel:** Exactly 11 individuals were photographed and visually indexed (shown in photo record on Page 3). Zero matched an enrolled employee whitelist; 100% are currently classified as Unregistered Personnel pending formal ID verification. Primary operator REAL-01 was involved in 8 events. **Attached Evidence:** All 20 incident clips are accessible in the single shared Google Drive folder: **https://drive.google.com/drive/folders/1uhX9iv6-uBRRgBP4xMopMYQNWnKL6oYo** **Actionable Next Steps:** 1. Conduct formal identity verification with plant administration for the 11 identified individuals. 2. Cross-reference plant operational logbooks against the recorded incident timestamps to verify if these activities corresponded to scheduled maintenance. 3. Review the attached Google Drive incident clips for complete video evidence.

Important Note: A missing recording or a video that looks different does not, by itself, prove that someone deliberately changed or deleted the footage. This report records what was observed and what could be verified from the material available.
