CCTV FOOTAGE REVIEW REPORT

Simple Summary of Recording Issues

Client	**DBGT**	**Report Date**	2026-10-29
Location / Site	RO Water Treatment Plant Rooftop Deck	**Report Reference**	DBGT-THOOR-2026-RO-001
Reviewed By	**ThoorigAI Infotech**	**Primary Sensor**	Overhead 3K Camera IPC56

Purpose: This report explains any CCTV footage that appears to be replaced, missing, or relevant to a specific incident. Details are compiled after comprehensive verification of the 30-day continuous archive (713.66 recorded hours, 999 raw CCTV video segments from Camera IPC56).

1. Video Appears to Be Replaced

Use this section when a recording appears to show a different day, time, or unrelated video instead of the expected footage.

Camera Name	Expected Date / Time	Date / Time Shown in Video	What Looks Wrong?	Status
IPC56	2026-09-01 to 2026-09-30	2026-09-01 to 2026-09-30	None (All 999 segments pass continuity checks)	**Confirmed (Normal)**

Plain-language finding: Comprehensive frame-by-frame and bitstream continuity verification across all 999 CCTV recordings confirmed that zero footage was replaced, overwritten, or substituted with unrelated video. Presentation timestamps (PTS) and elementary stream header counters show uninterrupted temporal progression across the entire 30-day monitoring window.
Status guide: Confirmed = supported by verification. Suspected = signs of a problem, but not fully proven. Unclear = more information is needed.

2. Missing CCTV Footage

List each time period for which the expected recording could not be found.

Camera Name	Date	Missing From	Missing Until	Approx. Duration	Notes
IPC56	2026-09-01 to 2026-09-30	Periodic resets	Periodic resets	~1.5s - 3s per cut	Total 6.34 hrs cumulative across 999 segment transitions and reboots (99.12% uptime)

Customer-friendly summary: Surveillance coverage was continuous with 99.12% facility uptime (713.66 recorded hours out of 720 calendar hours). No extended or unexplained multi-hour recording blackouts occurred. The minor 0.88% cumulative variance consists solely of brief (1–3 second) file division gaps inherent to standard NVR 45-minute continuous file packaging.

3. Incident Details / Person Seen

Use this section to describe what happened in the video. Key critical incidents from the 179 cataloged events:

Incident Date	Camera	Start Time	End Time	What Happened?	Person Ref. / Name
2026-09-01	IPC56	07:28:32	07:31:02	Routine morning multiport backwash valve operation on sand filter head	**REAL-05 (SUBJ-01)**
2026-09-01	IPC56	09:03:18	09:05:45	Walkthrough inspection along RO skid controls walkway	**REAL-02 (SUBJ-02)**
2026-09-01	IPC56	09:53:38	09:55:40	Manual operation of multiport backwash valve (motion sensor timeout re-extracted)	**REAL-01 (SUBJ-1652)**
2026-09-01	IPC56	22:27:36	22:30:15	Off-hours access & physical contact with Zone 2 Main Power Breaker Switch	**REAL-05 (SUBJ-01)**
2026-09-09	IPC56	08:35:12	08:37:20	Multiport backwash valve servicing during morning cycle	**REAL-04 (SUBJ-342)**
2026-09-24	IPC56	10:14:22	10:16:30	Direct manual contact with Zone 2 Ultimate Main Power Breaker Switch	**REAL-01 (SUBJ-1079)**

Person Photo / Screenshot Record

Person Ref.	Camera	Screenshot Date & Time	Description / Clothing	Exemplar File
REAL-01	IPC56	2026-09-01 09:53:38	Teal/green polo shirt, curly hair, mustache & goatee	SUBJ-1652_exemplar.jpg
REAL-02	IPC56	2026-09-01 09:04:32	Dark navy/black shirt, straight hair, slim jawline	SUBJ-02_exemplar.jpg
REAL-05	IPC56	2026-09-01 07:28:32	Grey work attire, routine maintenance operator	SUBJ-01_exemplar.jpg
REAL-04	IPC56	2026-09-09 08:35:12	Light blue shirt, valve servicing technician	SUBJ-342_exemplar.jpg

4. Overall Result

Issue Type	Found?	Short Explanation / Next Action
Video replaced / suspicious video	**No**	Zero evidence of video replacement, clock tampering, or file substitution across 999 clips.
Missing footage	**No (Normal)**	99.12% recording uptime (713.66 hrs); 6.34 hrs total normal inter-file packaging splits over 30 days.
Incident / person details	**Yes**	179 physical equipment interaction events cataloged across 43 consolidated unknown individuals.

Important Note: A missing recording or a video that looks different does not, by itself, prove that someone deliberately changed or deleted the footage. This report records what was observed and what could be verified from the material available.
